

# ADVICE LETTER SUMMARY

## ENERGY UTILITY

MUST BE COMPLETED BY UTILITY (Attach additional pages as needed)

Company name/CPUC Utility No.:

Utility type:

ELC       GAS       WATER  
 PLC       HEAT

Contact Person:

Phone #:  
E-mail:  
E-mail Disposition Notice to:

EXPLANATION OF UTILITY TYPE

ELC = Electric      GAS = Gas      WATER = Water  
PLC = Pipeline      HEAT = Heat

(Date Submitted / Received Stamp by CPUC)

Advice Letter (AL) #:

Tier Designation:

Subject of AL:

Keywords (choose from CPUC listing):

AL Type:  Monthly     Quarterly     Annual     One-Time     Other:

If AL submitted in compliance with a Commission order, indicate relevant Decision/Resolution #:

Does AL replace a withdrawn or rejected AL? If so, identify the prior AL:

Summarize differences between the AL and the prior withdrawn or rejected AL:

Confidential treatment requested?  Yes     No

If yes, specification of confidential information:

Confidential information will be made available to appropriate parties who execute a nondisclosure agreement. Name and contact information to request nondisclosure agreement/ access to confidential information:

Resolution required?  Yes     No

Requested effective date:

No. of tariff sheets:

Estimated system annual revenue effect (%):

Estimated system average rate effect (%):

When rates are affected by AL, include attachment in AL showing average rate effects on customer classes (residential, small commercial, large C/I, agricultural, lighting).

Tariff schedules affected:

Service affected and changes proposed<sup>1</sup>:

Pending advice letters that revise the same tariff sheets:

<sup>1</sup>Discuss in AL if more space is needed.

**Protests and all other correspondence regarding this AL are due no later than 20 days after the date of this submittal, unless otherwise authorized by the Commission, and shall be sent to:**

## Compliance Filing for LSEs with Long-Term Financial Commitments

February 12, 2025

CA Public Utilities Commission  
Energy Division  
Attention: Tariff Unit  
Served by Email

### **Advice Letter 12-E GHG Emissions Performance Standard Compliance Filing 2024**

Pursuant to Ordering Paragraph 4 of Decision 07-01-039, issued in Rulemaking 06-04-009 on January 25, 2007, Desert Community Energy submits this annual Attestation Letter affirming that the financial commitments Desert Community Energy has entered into for generation during the prior calendar year are in compliance with the greenhouse gas (GHG) emissions performance standard (EPS). Specifically, Desert Community Energy is in compliance with the EPS. Documentation supporting that compliance is provided below.

**Effective Date:** March 14, 2025 (30 days after filing)

**Tier Designation:** Tier 2 Designation

### **Purpose**

This Attestation Letter provides information and documentation required by D.07-01-039 for LSEs (electrical corporation, electric service provider, or community choice aggregator) with new long-term financial commitments (defined on Page 3 in Attachment 7 of D.07-01-039). This Attestation Letter demonstrates that for **2024** all financial commitments entered into by Desert Community Energy are compliant with the EPS.

### **Background**

Decision 07-01-039 requires all Load Serving Entities (LSEs) to file annual Attestation Letters, due February 15<sup>th</sup> of each year, attesting to the Commission that the financial commitments entered into for generation during the prior calendar year are in compliance with the EPS. Decision 07-01-039 requires LSEs to file Attestation Letters as an advice letter and serve the Attestation Letter on the service list in Rulemaking 06-04-009. This Attestation Letter is filed pursuant to that process.

Decision 07-01-039 requires LSEs to list long-term financial commitments of five years or longer that they have entered into during the prior year. Note that long-term financial commitments can be compliant if any of the following apply:

- 1) not in a baseload powerplant;
- 2) generation using pre-approved renewable resource technology;
- 3) existing combined-cycle combustion turbine (in operation/or permitted to operate as of 6/30/07) with an increase in rated capacity less than 50 megawatts (MW);
- 4) net emission rate of each baseload facility underlying a covered procurement does not exceed 1,100 lbs of CO<sub>2</sub> per megawatt hour (MWh);
- 5) exemption related to: reliability exemption, extraordinary circumstances or financial harm, and CO<sub>2</sub> sequestration through injection in geological formations.

Decision 07-01-039 requires all LSEs to disclose the investment amount and type of alteration to retained generation, by generation facility and unit. Decision 07-01-039 also advises LSEs to present documentation regarding the design and intended use of the powerplant(s) underlying their new long-term financial commitments utilizing the sources of information listed in California Public Utilities Code § 8341(b)(4), as well as any other sources of documentation that they believe will be relevant to this determination.

Decision 07-01-039 emphasizes that the key concept is to establish the design and intended use of the powerplant. Accordingly, documentation of the annualized plant capacity factor for the powerplant should include historical annual averages in order to help determine whether the plant is “designed and intended” to be used for baseload generation. Decision 07-01-039 requires LSEs to provide documentation of capacity factors, heat rates and corresponding emissions rates that reflect the actual, expected operations of the plant.

This Attestation Letter comports with the requirements outlined above.

### **Protests**

This compliance filing is not subject to protest pursuant to General Order 96-B, Energy Industry Rule 9.

### **Correspondence**

Any correspondence regarding this compliance filing should be sent by email to the attention of:

Lisa McNeilly  
Director of Energy & Sustainability  
Desert Community Energy  
[lmcneilly@cvag.org](mailto:lmcneilly@cvag.org)

### **Compliance Documentation**

The following listings and/or tables provide detailed and specific information regarding Desert Community Energy contracts and long-term financial commitments that are subject to the EPS requirements. The compliance documentation must match the compliance category outlined previously. For example, the information provided must demonstrate that the net emissions rate of each baseload facility underlying a covered procurement is no higher than 1,100 lbs of carbon dioxide (CO<sub>2</sub>) per megawatt hour (MWh).

1. Include a complete and detailed listing of the new long-term financial commitments of five years or longer they have entered into during the prior year with documentation to demonstrate:
  - a) Documentation demonstrating that such procurements are EPS compliant, including any contracts with a term of five years or longer that include provisions for substitute energy purchases.
  - b) For any requested reliability-based exemptions that have been pre-approved by the Commission, reference to the application and Commission decision number.
2. The complete listing of new long-term financial commitments of five years or longer must include “linked” contracts whose combined term is five years or longer.
3. Disclosure of LSE investments in retained generation, including “deemed-compliant” combined cycle gas turbines (CCGTs). All LSEs are to disclose the investment amount and a breakdown of alterations or refurbishments to retained generation, by generation facility and unit.
4. Present documentation regarding the designed and intended use of the powerplant(s) underlying their new long-term financial commitments utilizing the sources of information listed in § 8341 (b)(4), as well as any other sources of documentation relevant to the determination.
5. Provide documentation of capacity factors (for definition of capacity factor see Section 5.6 of D.07-01-039.), heat rates and corresponding emissions rates

that reflect the actual, expected operation of the plant (not full load heat rate). Documentation of the annualized plant capacity factor for the power plant should include historical annual averages in order to determine whether the plant is “designed and intended” to be used for baseload generation at an annualized plant capacity factor of at least 60%.

**List of Long-Term Power Purchase Agreements**

**Table 1—EPS Compliant Contracts**

<b>Project Name</b>	<b>Technology</b>	<b>PPA Executed</b>	<b>County</b>	<b>PPA Term (years)</b>	<b>EPS Compliant</b>	<b>Compliance Category</b>
Terra-Gen East Wind	Wind	12/2020	Riverside	15	Yes	Non-baseload
Terra-Gen Altwind	Wind	12/2020	Riverside	15	Yes	Non-baseload
Terra-Gen Coachella Hills Wind II	Wind	1/2021	Riverside	15	Yes	Non-baseload
Cape Generating Station 1	Geothermal	9/2022	Beaver, Utah	15	Yes	Non-baseload

**Certification**

- (1) I have reviewed, or have caused to be reviewed, this compliance submittal.
- (2) Based on my knowledge, information, or belief, this compliance submittal does not contain any untrue statement of a material fact or omit to state a material fact necessary to make the statements true.
- (3) Based on my knowledge, information, or belief, this compliance submittal contains all of the information required to be provided by Commission orders, rules, and regulations.
