Understanding your energy choices

Desert Community Energy (DCE) and Southern California Edison (SCE) worked together on this comparison of our common rates and the power sources we provide to help you decide which service and rates work best for you. This comparison illustrates the estimated electricity costs for a typical commercial customer within Desert Community Energy’s service territory with an average monthly energy use of 1068 kilowatt hours (kWh). This comparison is based on Desert Community Energy rates effective as of July 1, 2026. SCE rate options are based on rates effective June 1, 2026. Both Desert Community Energy and SCE’s rates are subject to change.

Generation Rate reflects the cost of producing or purchasing electricity to power your business. This rate depends on usage, and will vary depending on your service provider and rate plan.

SCE Delivery Rate is a charge assessed by SCE to deliver electricity to your business. This rate depends on usage.

Surcharges represent the Cost Responsibility Surcharge (CRS) and Franchise Fee (FF) that are applicable to Community Choice Aggregation (CCA) customers and SCE customers that elect a Green Rate. The CRS is a surcharge to recover costs associated with power purchases made on behalf of customers, prior to a customer’s switch to a CCA or SCE Green Rate. The FF recovers taxes owed to a city in exchange for allowing SCE to utilize electrical distribution lines throughout the property of the city. SCE acts as the collection agency for the FF surcharge which is levied by cities and counties for all customers.
